ABOUT US

Cojali S. L., based in Campo de Criptana, is a Spanish multinational manufacturer of components and electronics, which also develops solutions of advanced diagnostics, connectivity and remote diagnostics for commercial vehicles, agricultural equipment, OHW equipment, material handling equipment and vessels, as well as ISOBUS compatibility solutions for tractors and implements.

Thanks to the wide expertise in the development of on-board and workshop technology solutions, Cojali is actively working on data processing and analysis, being this a strategic business activity, which enables the implementation of improvement processes and the release of new products onto the market.

Finally, Cojali provides a comprehensive training offer, as well as complete solutions for technical support, aimed at ensuring the successful use of technology in the automotive industry.

Cojali S. L. has three subsidiaries: Cojali France, Cojali Italy and Cojali USA, and four sales offices in Germany, Turkey, Mexico and India.

COJALI ALWAYS LOOKS FORWARD WITH THE PURPOSE OF OFFERING CUTTING-EDGE TECHNOLOGY WITHIN THE AUTOMOTIVE INDUSTRY.

Note: Jaltest Link + Software + Licence activation (one year) are compulsory to perform diagnostics.

KNORR-BREMSE DIAGNOSTICS ADD-ON NEW

Knorr-Bremse Diagnostics Add-On is the new Knorr-Bremse software which, from 24.2, has been integrated into the Jaltest Diagnostics software. This enables Knorr-Bremse's proprietary diagnostics to be performed in vehicle manufacturers (truck and trailer) that integrate this system, including the new iTEBS X system, the new EBS generation for trailer. This software also includes the original technical information.

Software activation

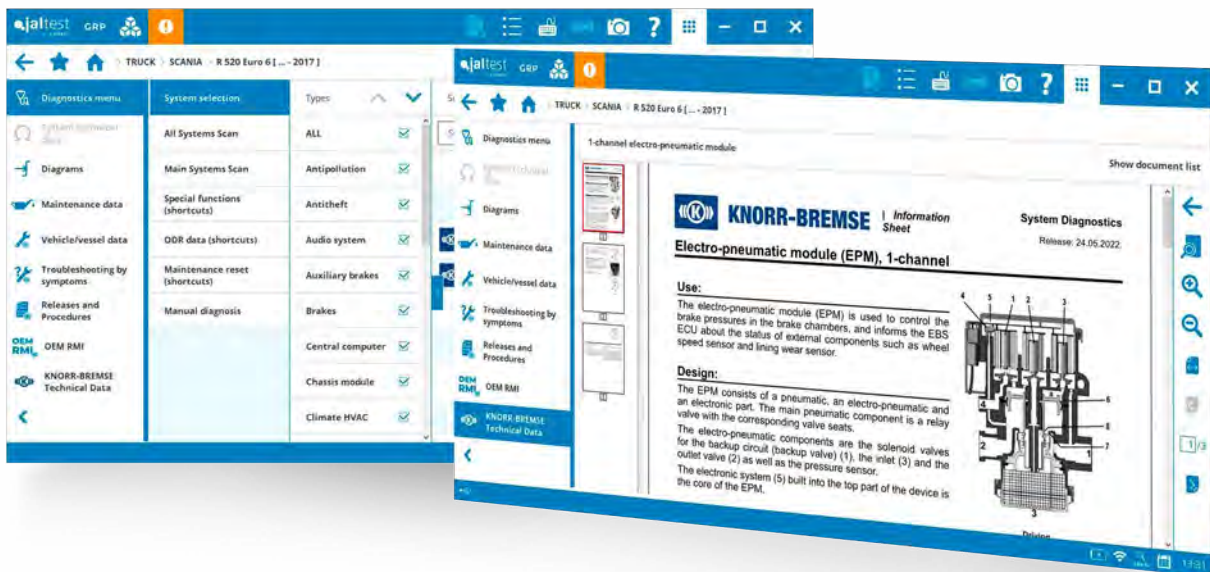

Reference	Description	Price	More Info
71502007	Knorr-Bremse Diagnostics Add-On - Software (Licence of use) NEW	495,00 €	Coming Soon

Renewal, second and successive years

Reference	Description	Price	More Info
71602007	Knorr-Bremse Diagnostics Add-On - Renewal of licence of use - One year NEW	495,00 €	Coming Soon

Licence of use, one day (only applicable to licence upgrades)*

Reference	Description	Price	More Info
71602008	Knorr-Bremse Diagnostics Add-On - Activation of licence of use - One day NEW	1,35 €	Coming Soon

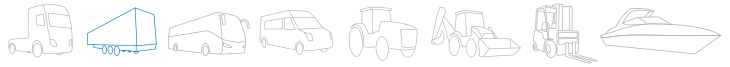

*Note: A valid CV or modular trailer licence will be required for its subscription, since Knorr-Bremse Diagnostics Add-On validity would be the same as this licence.

**Note: The access to the Knorr-Bremse Diagnostics Add-On module will be locked if the licence is not renewed.

KNORR-BREMSE DIAGNOSTICS

Knorr-Bremse Diagnostics is the development of NEO Green which, from 24.2, is under the Jaltest Diagnostics tool. This enables Knorr-Bremse's proprietary diagnostics to be performed in vehicle manufacturers (truck and trailer) that integrate this system, including the new iTEBS X system the new EBS generation for trailer. This software also includes the original technical information and cannot be combined with other Jaltest licences.

JALTEST DATA-LINK

Jaltest Data-Link is the new vehicle communication interface compatible with the regulations RP1210 and SAE J2534 (Pass-Thru), which allows the connection with diagnostics tools from different manufacturers.

This device includes the Jaltest RPD software, that allows the reading and clearance of fault codes, as well as the display of measurements according to the standards SAE J1708, J1939 and OBD-II in any vehicle using those protocols.

JALTEST PTE (Portable Trailer e-Supply)

Jaltest PTE is a mobile device designed to check the power supply and the signals that are transferred between the tractor head and the towed vehicle, such as lighting, indicator lamps, and CAN communication. It has two operating modes, depending on whether the check is required in the tractor head or in the towed vehicle. In addition, Jaltest PTE can be used as external power supply in the towed vehicle, therefore being possible to diagnose the systems with electronic control through the Jaltest diagnostics tool without tractor head.

Through LED lighting, Jaltest PTE shows the status of each one of the electric signals of the ISO 7638 and ISO 12098 connectors, providing a quick and safe check.

*Note: This cable is compulsory in the UK market.

JALTEST SST (Speed Sensor Tester)

Jaltest SST is a portable device of small size designed to check the correct operation of active and passive speed sensors. It has two operating modes that comprise tests of both the sensor and the ECU to which it is connected.

Through a lighting panel of LED devices, the user can easily detect potential errors without carrying out difficult and complex tests.

This product enables the user to significantly reduce the time spent on checks and fault detection by spotting the focus of the issue.

Hardware

Reference	Description	Price	More Info
50004002	Jaltest SST (Speed Sensor Tester)	279,00 €	web

JALTEST WST (Wear Sensor Tester)

Jaltest WST is a portable device of small size designed to check the correct operation of brake pad wear sensors as well as their state.

It has a selector that enables the user to choose the type of sensor to be checked and, through a display incorporated to the device, see the voltage value (V) in an easy way.

It reduces considerably the time invested in checks thanks to the cable kit that provides an optimal connection.

Hardware

ADBLUE/DEF MODULE CLEANING KIT

Equipment for cleaning crystallised AdBlue/DEF residues in the dosing module, the injector line and the injector.

It applies to:

- NoNOX system (MAN TGL, TGM, TGS, TGX and Euro 6 buses with AdBlue/DEF Emitec system).
- Emitec AdBlue/DEF system in vehicles with Cummins engine.
- Albonair AdBlue/DEF system (Volvo, Renault, UD Trucks and other Euro 6 vehicles).
- Bosch Denoxtronic 2.2 and Denoxtronic 6-HD AdBlue/DEF system (DAF, Iveco, MAN, other Euro 6 vehicles, agricultural equipment, OHW equipment, etc.).
- AdBlue/DEF Cummins Ecofit UL2 system (DAF, Mercedes-Benz, Scania, other Euro 6 vehicles, agricultural equipment, OHW equipment, etc.).

MDC08	Diagnostics cable for EBS modules	84,00 €	
MDC10	Diagnostics cable for wear sensors	89,00 €	
MDC11	Diagnostics cable for wear sensors	97,00 €	
MDC12	Diagnostics cable for speed sensors	78,00 €	

ETM Renewal. Licence of use (second and successive years)

Reference	Description	Price
29701	Jaltest ETM - Renewal of licence of use - One year	170,00 €

*Hardware, Software and Licence of use of the ETM will match the Jaltest software licence expiration date. When the subscription of the Jaltest software licence is valid for more than one year, you will be charged with the amount corresponding to the number of days of the remaining licence. Once the licence has expired, the ETM will no longer be operative. The client will not be able to use it until the licence is renewed.

Note: ETM not available for Jaltest handheld units.

Note: It cannot be purchased separately.

Licence of use, one day (only applicable to licence upgrades)

Reference	Description	Price
29711	Jaltest ETM - Renewal of licence of use - One day*	0,43 €

*Note: To be EXCLUSIVELY used for the calculation of days of licence upgrades in conjunction with other existing modules. The validity of the newly purchased licences must always match the validity of the original licence.

MULTIPIN KIT. JALTEST ETM

Multipin kit developed to diagnose a wider range of speed sensors and brake pad wear sensors.

Ref: **JTP98**

Price: **189,00 €**

Free promotional module in 2024.

Note: Included in Jaltest software. Internet connection required. It cannot be purchased separately.

Jaltest

OEM RMI

OEM

RMI

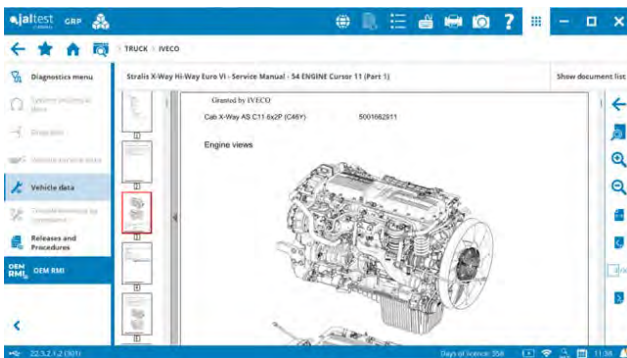

JALTEST OEM RMI (REPAIR AND MAINTENANCE INFORMATION)

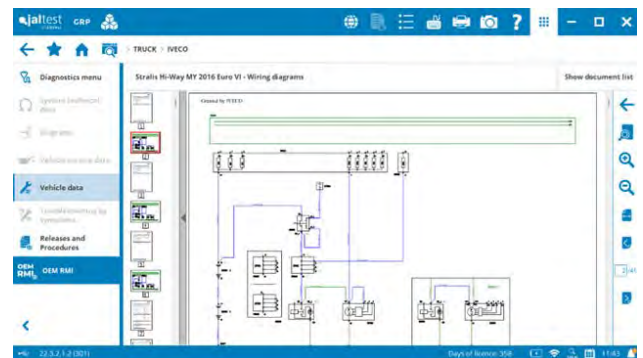

RMI stands for “Repair and Maintenance Information”, that is, technical information for the repair and maintenance of vehicles.

In this regard, Cojali has signed an agreement with some manufacturers of the 7 main truck brands in order to integrate a module in Jaltest Diagnostics that allows access to this technical information and whose subscription can be made by brand. This module is based on the regulation EU 2018/858 by which vehicle manufacturers must give access to the information relative to diagnostics, service and maintenance.

Available brands

70901022	OEM RMI MAN. Monthly subscription	350.00 €	web
70901023	OEM RMI MAN. Yearly subscription	900.00 €	web

Note:

- OEM RMI licences will not be aligned with the rest of the Jaltest Diagnostics software subscriptions. Therefore, the subscription will be made independently for the selected time period.
- The subscription to the OEM RMI module and its access will only be possible if there is a Jaltest Diagnostics licence of commercial vehicle in force*. If the OEM RMI subscription exceeds the validity term of the equipment licence, the access to this module will not be possible until the equipment licence is renewed.
- Internet connection is required to access the OEM RMI module after subscription. In addition, in order to guarantee an optimal and efficient service, a fast and stable connection is advisable.

*Commercial vehicle, Modular Truck or Truck Select of the brands for which OEM RMI has been acquired.

Jaltest **INFO PLUS**

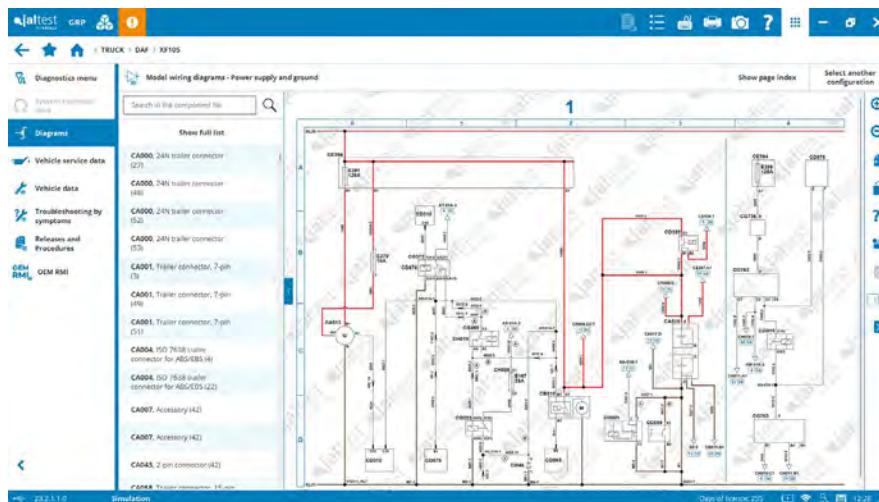

JALTEST INFO PLUS

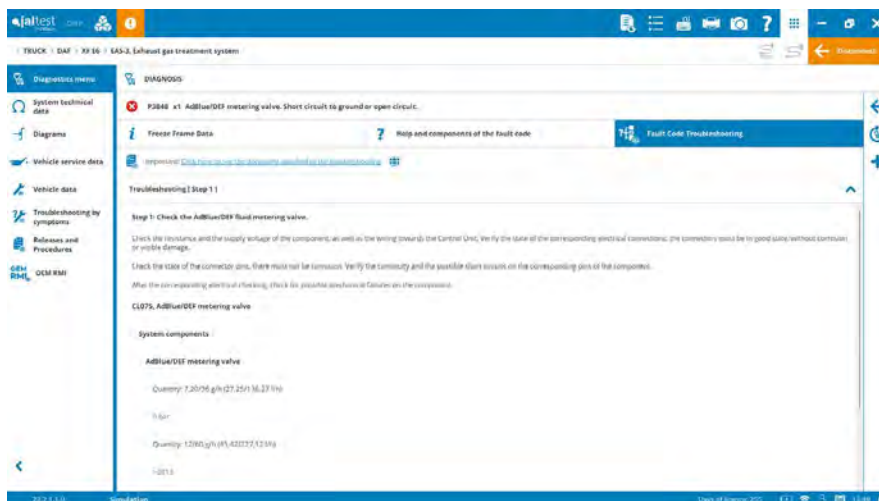

Jaltest INFO Plus is the innovative module of technical information that includes **smart guides** and **wiring diagrams of the model**, thus providing a huge amount of additional technical information for the repair and maintenance of vehicles. With a fast and intuitive design, this module optimises the working times at the workshop through guided processes and includes worthy wiring diagrams of the complete vehicle.

After two years of promotion, **Jaltest INFO Plus** is now available for purchase, provided that there is a CV (or Modular) licence in force.

 **Wiring diagrams of the model:** They represent the electrical connections of the vehicle in its totality, including all electrical components, wiring and connectors.

 **Smart guides:** Guided repair processes to redirect the user to the right step, depending on the vehicle state, fault codes and parameters registered. This way, we prevent the Jaltest user from checking unnecessary steps.

Jaltest

SGW Unlocking

SGW UNLOCKING (SECURITY GATEWAY)

Jaltest Diagnostics allows access to protected vehicles that are equipped with a SGW security module in order to perform advanced diagnostics functionalities. Our equipment has been approved as compatible tool by Iveco and FCA, offering easy connection between the user's diagnostics tool and the OEM authentication servers.

Jaltest allows its users to access diagnostics functionalities such as bidirectional tests, DTC clearing and the rest of functions necessary to carry out the complete repair of the vehicle.

- Advanced functions.
- Component actuation.
- Maintenance service and calibration.

Note: A Jaltest device with licence in force is required.

FCA SGW

Reference	Description	Price	More information
70607001	FCA SGW	180,00 € (One year from the subscription date)	web

Iveco SGW activation

Reference	Description	Price	More information
70607002	Iveco SGW activation per company	80,00 € (31st December of the ongoing year)	web
70607003	Iveco SGW activation per device	200,00 € (31st December of the ongoing year)	web

Iveco SGW renewal

Reference	Description	Price	More information
78500001	Iveco SGW renewal per company	80,00 € (31st December of the ongoing year)	Coming Soon
78500002	Iveco SGW renewal per device	80,00 € (31st December of the ongoing year)	Coming Soon

Note: To subscribe to the SGW module for Iveco, the product must be acquired per company (70607002) and per device (70607003). The renewal of SGW must be requested from 1 November to 15 December of the ongoing year, thereby acquiring references 78500001 and 78500002. If the renewal is requested after 15 December, in order to continue having access to the services, a subscription to SGW as a new activation will be required per company (70607002) and per device (70607003).

Note: Cojali reserves the right to modify the prices of the SGW module at any moment and without previous written notification. The subscription process must always be carried out through Cojali.

Jaltest **INFO Web**

JALTEST INFO WEB

Nowadays, having information related to our vehicle, regardless of the moment and place, is becoming increasingly important. Therefore, Cojali has developed **Jaltest INFO Web**, a platform accessible to all that offers all technical information available in Jaltest in a fast and easy way.

If you are a Jaltest distributor, you can now subscribe **Jaltest INFO Web** for CV, AGV, OHW, MHE and Marine (complete) modules through the distributor access at www.jaltest.com, for both Jaltest users and non-Jaltest users.

Upon subscription, **Jaltest INFO Web** can be accessed from any device* using internet connection, by logging in at <https://infoweb.jaltest.com/> with the email address provided for this matter.

CONDITIONS

1. Non-Jaltest user price policy applies to Jaltest units with expired licences.
2. Per each device with licence in force, a maximum of 10 Jaltest INFO Web accounts can be subscribed at Jaltest user price. In the event of being interested in subscribing to this product for a larger number of accounts, please contact Cojali.
3. For Jaltest user accounts, the validity of Jaltest INFO Web will be aligned with the current licence of the device.
4. For Jaltest devices with one or more licences in force, any INFO Web product will be purchased at Jaltest user price.

Jaltest Training programme

JALTEST UNIVERSITY

In Jaltest, we offer universal and quality training within the reach and at the disposal of any professional in the sector. Our Jaltest University division includes our entire training offer, from courses traditionally taught on-site to e-learning courses.

JALTEST UNIVERSITY ON TOUR

From Cojali we aim at making our distributors from all over the work involved in this new training modality called Jaltest University On Tour, so that they can provide their workshops the same training that we offer at our facilities.

These training courses are addressed to the workshops, clients of our official distributors, which can select the course available in the program Jaltest e-learning. The training will be taught by a qualified trainer who will go to the facilities where the distributor wants the course to be held, and it will be conducted in Spanish or English. Should the course be conducted in another language, the distributor will provide a translator from English into the desired language.

The course duration can be chosen by the distributor according to their needs, between 1 and 2 days:

- 1 day*: The course will consist in 8hrs of exclusively theoretical training.
- 2 days**: The course will be split in a theoretical and a practical part for 8hrs each day. This modality will enable the participants to put into practice the concepts acquired during the training. For the practical part, there will be hands-on workshops in test benches and/or vehicles.

Note: In both cases, the distributor will be responsible for arranging the booking of the facilities and preparing the vehicles, if applicable.

Reference	Description	Price per day
710100004	Trainer travel day	480,00 €
710100005	Training day	2.000,00 €

1-day training (total cost)

Price: **2.960,00 €**

2-day training (total cost)

Price: **4.960,00 €**

*Accommodation, meal allowance and flights of the trainer not included. These expenses are to be borne by the distributor.

**For courses conducted outside Europe, it will be required to contract 2 days at least.

TRAINING COURSES FOR DISTRIBUTORS (not subscribed to Jaltest Service)

 **2-day training in Spain, English language** (Minimum 10 participants)

Price: **1.000,00 € / person**

Note: Travel and hotel expenses not included

JALTEST E-LEARNING

Price: **95,00 € per course**

Jaltest University offers training available to everyone, anytime and anywhere through Jaltest e-learning. It is an online training platform that allows technicians to learn about topics related to commercial vehicles, agricultural equipment and OHW equipment.

Jaltest e-learning manages to show the technical content in a very intuitive, didactic and entertaining way. The syllabus of each course is shown through:

- Fast and easy navigation on the topic.
- High-quality explanatory videos, with the possibility of playing and pausing at any moment.
- Images that can be enlarged to improve the content display.
- Learning test.
- Sending of emails with resolution of questions and comments.
- Resolution of doubts directly with the trainer.

In short, Jaltest e-learning facilitates the learning of the technician, who is able to set their pace of learning.

Note: Please contact Cojali to get more information about the availability of our training courses in other languages.

Jaltest **ATS**

JALTEST ATS (ADVANCED TECHNICAL SUPPORT)

One year of Jaltest ATS (English language)

Jaltest ATS will provide solutions to optimise the repair times at your workshop.

This support consists of:

1. Advanced technical support, hotline service. Monday to Friday: **8am - 6pm (GMT+1)**
2. Access to technical information through our website: www.jaltest.com
3. Access to technical documents (wiring diagrams, graphs, etc.) via e-mail.
4. Technical explanations for document interpretation.
5. Support for the search, location and interpretation of breakdowns.
6. Support for electrical, electronic and pneumatic breakdowns, for all electronic controlled systems installed in a vehicle.
7. Online Advanced Technical Support.
8. Online version presentations.

One year of ATS:

Reference	Description	Price
29069	One year of ATS. Jaltest CV	915,00 €
29754	One year of ATS. Jaltest AGV	650,00 €
70809004	One year of ATS. Jaltest AGV + MHE	650,00 €
70803004	One year of ATS. Jaltest OHW	915,00 €
70808004	One year of ATS. All modules	915,00 €
29806	One year of ATS. MHE	500,00 €
29765	One year of ATS. Jaltest Marine	500,00 €
29805	One year of ATS. Jaltest ADAS	360,00 €
70807004	One year of ATS. Multi-Purpose vehicles	500,00 €
70809006	One year of ATS and product support. NEO Green/Knorr-Bremse diagnostics NEW	500,00 €

Note: The advanced technical support service has an annual periodicity and will be renewed automatically. Acceptance of this service requires maintaining such service for a period of 12 months. The eventual resignation of the service shall be formalised in writing at least thirty days prior to the deadline.

JALTEST LICENCE OF USE TERMS AND CONDITIONS

The table below contains a definition of the main characteristics related to the different Jaltest product license types.

SOFTWARE	LICENCE TYPE	LICENCE UPGRADE	LICENSE DOWNGRADE	AFTER EXPIRATION	RENEWAL AFTER EXPIRATION	REGISTRATION PROCESS
CV	TRUCK TRAILER BUS LCV MANUFACTURER	AGV OHW MHE MARINE	YES	- All diagnostics functions. - No technical information. - Expert mode available. - No ETM.	- No more than 15 days from the expiration date: X years from the expiration date. - After 15 days from the expiration date: X years from the renewal date.	- Licence activation. - After the release of a new version. - Every six months (This applies regardless of whether the licence is expired or not). (Otherwise the software will be blocked)
AGV	AGV TRACTORS COMBINES FORAGE HARVESTERS GRAPE HARVESTERS TELESCOPIC HANDLERS	CV OHW MODULARS MHE MARINE	NO	- All diagnostics functions. - No technical information. - Expert mode available.	- No more than 15 days from the expiration date: X years from the expiration date. - After 15 days from the expiration date: X years from the renewal date.	- Licence activation. - After the release of a new version. - Every six months (This applies regardless of whether the licence is expired or not). (Otherwise the software will be blocked)
OHW	EARTHMOVING AND OHW EQUIPMENT STATIONARY ENGINES MULTI-PURPOSE VEHICLE	CV AGV MODULARS MHE MARINE	YES	- All diagnostics functions. - No technical information. - Expert mode available.	- No more than 15 days from the expiration date: X years from the expiration date. - After 15 days from the expiration date: X years from the renewal date.	- Licence activation. - After the release of a new version. - Every six months (This applies regardless of whether the licence is expired or not). (Otherwise the software will be blocked)

JALTEST LICENCE OF USE TERMS AND CONDITIONS

ADDITIONAL INFORMATION RELATED TO ALL LICENCE TYPES

1. Maximum installations allowed per licence: 3 PCs. Jaltest hardware is compulsory to execute Jaltest software in a PC.
2. The installation package can only be executed with a licence in force.
3. ETM can only be executed by acquiring an ETM licence and if the Jaltest software licence is in force.
4. ETM is only compatible with CV and Modular licences.
5. Some modules of technical information will require Internet connection. The software will inform the user if necessary.
6. Devices with more than one subscribed module may have expired licences that will behave in the same way as separately after expiring.
 - 6.1 Modules with expired licence before 01/01/2022 will be locked.
 - 6.2 Modules with expired licence after 01/01/2022 will automatically maintain the coverage of the last version installed before the expiration of the licence (22.1, 22.2, 22.3...).

JALTEST RECOVERY FEE FOR NON-MODULAR EXPIRED LICENCES

In the event of a problem that prevents the access to Jaltest software, it is possible to reinstall the latest version subscribed by the client. To do so, it will be necessary to purchase a Jaltest Recovery Fee.

- This procedure will be free of charge in case the licence has expired within 2 years from the date of request.
- The fee detailed below applies for licences expired for more than 2 years.

Jaltest Recovery Fee

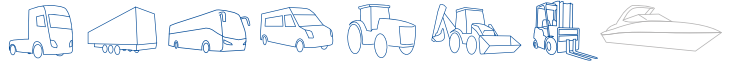

Ref: **29226**

Price: **450,00 €**

EXPERT MODE

1. In order to obtain the Expert Mode code, the user must register at the Jaltest website, www.jaltest.com, select the Expert Mode option and fill in the information required. The code will be sent by email.
2. If the Expert Mode code changes, the software will inform the user about the need of generating a new code.
3. It will not be possible to generate the Expert Mode code if the licence has expired.

JALTEST TELEMATICS: COJALI 360° PREDICTIVE SOLUTION

Cojali offers a complete 360° predictive solution for large fleets, providing all the required tools, from the on-board vehicle solution to the workshop networks, in order to gather and manage all the valuable information to apply Artificial Intelligence models and use this knowledge for the continuous improvement of products and services.

BENEFITS

- ✓ Continuous vehicle improvement.
- ✓ Reduction of contingencies and vehicle downtime.
- ✓ Increased security.
- ✓ Optimisation of maintenance operations.
- ✓ Intelligent supply and logistics.
- ✓ Carbon footprint reduction.
- ✓ Improvement of workshop activities.
- ✓ Optimised predictive AI models.
- ✓ Extension of component lifetime.

●jaltest GRP

GRP BASIC: Client list.
Reports (diagnostics, maintenance and ETM).

GRP SYNCHRO: GRP Basic.
User accounts control (10 maximum). Human Resources.
Data Synchronization between multiple PCs. (Same Jaltest interface).
Information back-up.

GRP NETWORK: Access to diagnostics and maintenance reports between multiple workshops inside a network.

GRP ENTERPRISE: GRP Synchro.
Workshop Management Module.
Reception Module.
"My Tasks" Module.
Jaltest Telematics Module.
Data synchronisation between PCs (same company).
Work order reports.
User accounts control (unlimited).

Note: Included in Jaltest software.

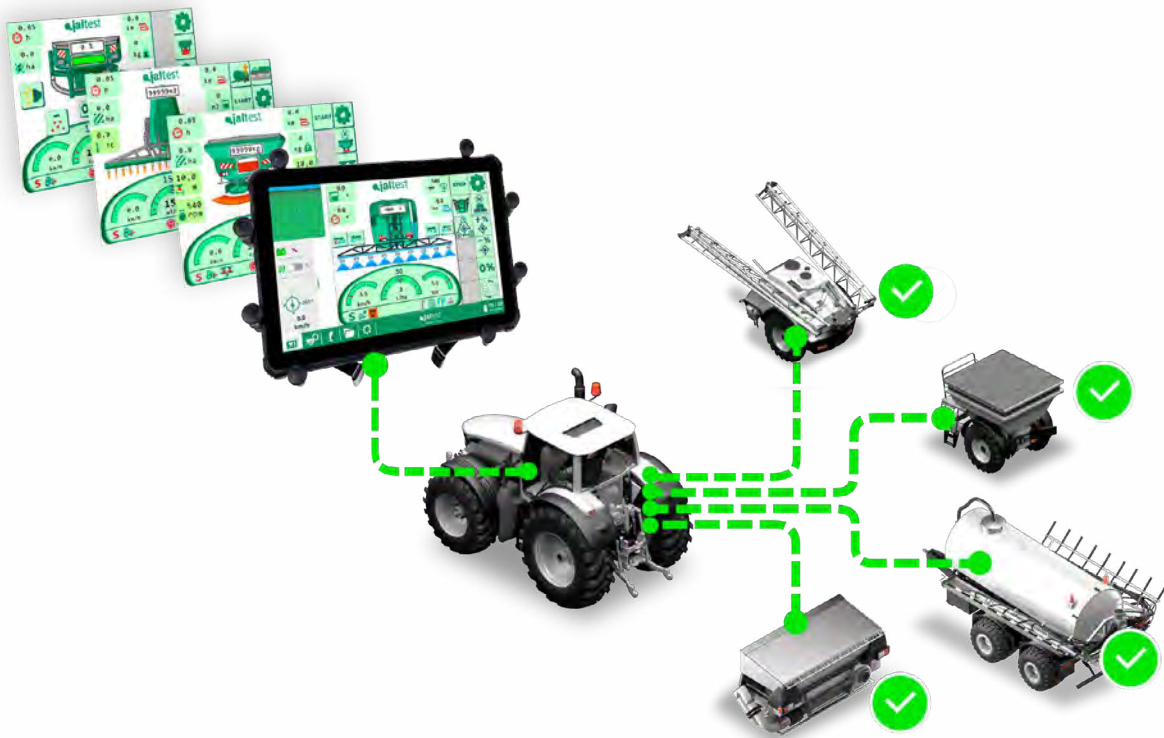

JALTEST ISOBUS

Jaltest ISOBUS offers solutions for the digitalisation of all types of agricultural equipment, ensuring compatibility between agricultural implements and tractors regardless of the manufacturer. The purpose is to achieve the maximum performance of agricultural equipment in order to manage successfully and easily a productive and efficient business, adapted to new technologies and environmental demands.

1. It ensures total compatibility between agricultural implements and tractors regardless of the manufacturer.
2. It controls all agricultural implements from a single working screen in the tractor.
3. It optimises times, resources and machines.
4. It automates the agricultural process.
5. It maximises the agricultural production and reduces costs.
6. It obtains efficient data for the decision-making and future season planning.

ISOBUS is a standard communication protocol created by the main manufacturers of agricultural equipment that ensures compatibility between tractors and agricultural implements of different manufacturers, enabling the data exchange by means of a universal language and a single screen in the tractor cab.

COJALI S.L GENERAL SALE CONDITIONS

These General Sales Conditions of COJALI S. L., hereafter Cojali, will be applicable to all the commercial relations maintained with its clients. This document invalidates all previous General Sales Conditions different from those included in this document.

1. Definitions

In these Conditions, the following terms shall bear the meaning defined below: "Seller" refers to Cojali.

"Client" refers to the natural or legal person who contracts the purchase of Goods with the Seller.

"Goods" refers to the product sold by the Seller to the Client pursuant to these General Sales Conditions.

2. General Information

The sale and supply of Goods, made by the Seller, shall be governed by these General Sales Conditions, except for those matters expressly agreed upon otherwise in the corresponding offer.

The Client considers themselves informed about the General Sales Conditions and accepts these, to all intents and purposes, from the moment in which the order of Goods is placed to the Seller.

If these General Sales Conditions are subject to translation into any foreign language, Spanish language shall prevail over any other translation in the event of disputes, contestations, lawsuits or difficulties in the comprehension or compliance with the General Sales Conditions, particularly those referring to the relations between the parties.

3. Intellectual and Industrial Property

The Seller does not own third-party trademarks, which are used only as a reference. Allusions to original brands are made for the identification of the products commercialised by the Seller, only for guidance purposes. Therefore, the Seller does not have corporate connection with the companies that own said trademarks.

The intellectual and/or industrial property of the Goods, the attached information, equipment, layouts, pictures, drawings, software incorporated or related thereto, belong to the Seller. Therefore, their use for other purposes is expressly prohibited for the Client, as well as their total or partial copy or transfer of use to third parties without the prior written consent of the Seller.

4. Orders

In order to consider the order of Goods performed, the Seller shall expressly accept it, thus becoming binding for both parties from that moment.

Orders placed by email, fax or any other means that proves in written form the acceptance of the order by the Seller will be fully valid.

Weights, dimensions, capacities, technical specifications and configurations regarding the Goods of the Seller included in the catalogues, flyers, leaflets and technical documents are intended for guidance and have non-binding effects.

Modifications and/or variations in the orders proposed by the Client shall be notified to the Seller in written form, by any means that thereby provide a written record. For these modifications or variations to become valid, they shall be expressly accepted by the Seller.

5. Prices

Prices exclude any taxes, duties or charges, which will be passed on later in the invoice, with the corresponding tax rates, as well as any expenses related to the sale of the Goods and their delivery.

Unless otherwise stipulated in the order, or an agreement on this matter between the Client and the Seller derived from their commercial relations, the prices do not include transport costs, which will be always charged as an independent concept. The prices may be changed by the Seller at any time by providing written notice to the Client.

6. Conditions of payment

The invoice issued by the Seller will include the sales payment conditions of the Goods. Said conditions shall comply with the instalments of the Spanish Law 15/2010, of 5 July, which establishes measures to combat late payment in commercial transactions, without exceeding under any circumstances the time limits established therein.

In the absence of an agreement between the parties, the payment shall be made upfront in any case.

The payment shall be made to the bank account of the Seller.

The payment shall be made without any deductions such as non-agreed withholdings, discounts, expenses, taxes or fees, or any other deduction.

If for reasons beyond the control of the Seller the delivery of the Goods is delayed, the conditions and instalments of the contractual payment shall remain.

In case of late payment by the Client, they shall pay to the Seller, without any requirement and from the payment due date until the actual payment of amounts due is made, the interest on arrears of the payment, which shall be calculated in accordance with the Spanish Law 3/2004, of 29 December. The payment of said interests shall not free the Client from the obligation of making the remaining payments under the agreed conditions.

Likewise, when the Client incurs in arrears, they shall be responsible for all costs of collection, such as litigation costs or arbitration costs, as well as the lawyers' fees, incurred by the Seller to enforce payment.

If the Client incurs in arrears of the agreed payments, the Seller may suspend temporarily or permanently, at their convenience, the delivery of Goods or the execution of the associated services, without prejudice of requiring the Client the payment of the arrears and of demanding, when applicable, additional compensations for this suspension in the delivery of Goods or the execution of the associated services.

7. Domain Reservation

As established in the Spanish Law 3/2004, of 29 December, which establishes measures to combat late payment in commercial transactions, the Seller will retain ownership of the Goods supplied to the Client until the full payment of their price.

In case of non-payment of the sale price of the Goods by the Client, they are obliged to return them to the Seller, being responsible for all costs and risks incurred in such return.

8. Delivery Term and Conditions

The time and place for the delivery of Goods shall be specified by the Seller in the acceptance of the order.

The delivery time may be modified when:

a) The Client fails to deliver on time the necessary documentation to place an order of Goods.

b) The Client requires changes in the order that, accepted by the Seller, cause a delay in the delivery, which shall be duly notified to the Client.

c) To carry out an order, it is imperative that the Client or their subcontractors perform any work and that these have not been implemented on time.

d) The Client has failed to fulfil the contractual obligations of the order, especially those related to the payments.

e) Due to causes not attributable to the Seller that could lead to delays in the production or delivery of all or any of the Goods of the order. The following are considered valid explaining reasons for the delay: strikes of suppliers, transport and services, failure in the supply by third parties, breakdowns in transport systems, floods, storms, riots, strikes, strikes of the personnel of the Seller or their subcontractors, sabotage, accidental stops of the Seller workshops due to breakdowns, etc. and force majeure events included in the current legislation.

In the previous cases, the delay in the delivery shall not imply any changes in the payment conditions of the order of the Goods.

9. Packaging

The packaging materials that come along with the Goods will belong to the Client.

Notwithstanding the foregoing, upon delivery of the Goods to the Client, the Client shall be fully responsible for them and in particular for their proper handling in accordance to the applicable regulations, especially in the areas of safety, environment, and waste treatment.

10. Inspection and Receipt

Once the order is received by the Client, they shall verify its content within 10 days from the date of receipt, in order to verify any defects and/or faults that may be imputed to the Seller, and shall communicate immediately to the Seller the existence of these defects and/or faults in order to take the measures deemed necessary for their elimination.

After these days from the date in which the Client receives the order of Goods, and without the Seller having received written notice of eventual defects and/or faults, the order shall be considered as accepted, and commencing from that day the warranty period.

11. Return of Goods. Claims

On the 10-day period established in the previous clause, the Client may notify the Seller of their intention to make a return, which shall be properly justified. The Seller shall communicate the procedure to be followed so that the refund is performed correctly, upon express acceptance of the refund.

The return of the Goods claimed by the Client shall be carried out with the original packaging and in perfect condition.

Once the return has been delivered in the facilities of the Seller, its content and state shall be checked. Those Goods already used, assembled in equipment or disassembled will not be accepted.

In any case, the claims of the Client to the Seller shall be submitted in written form.

12. Warranties

The Seller warrants the supplied products in relation to defects in materials, manufacture or assembly for a period of one year.

The warranty shall consist in the repair or replacement of the items that have been recognised as defective, either by defects in material or by defects on manufacture or assembly. The repair shall be made at the facilities of the Seller and the Client shall be charged with the expenses incurred by the submission of the products or defective items to the Seller, such as transport expenses, taxes, customs, etc., as well as the costs of the subsequent delivery, once the reparation has been made.

The repair or replacement of defective items does not change the starting date of the warranty period of the whole product, which will be of one year. Under no circumstances shall the Seller be responsible for the repairs carried out by personnel not belonging to its organisation.

The damage or defects due to normal wear because of the use of the Goods remain excluded from the warranty. It remains also excluded from the warranty, which shall be considered expired, the damage and defects caused by negligence, beatings, misuse, inadequate preservation or maintenance, incorrect or defective assembling or installation, variations in the quality of the power supply (voltage, frequency, disturbances...), modifications made to the Goods without the approval of the Seller, installations made without following the technical instructions of the Goods, and in general any cause that is not attributable to the Seller.

The Seller is not responsible for the damages caused by the Goods during the warranty period. The Seller is only responsible for the replacement of the damaged Goods.

13. Disclaimer

The liability of the Seller, their agents, employees, subcontractors and suppliers for the claims arising from the performance or breach of their contractual obligations is limited to and shall not exceed the whole contractual base price and shall not include either in any case the damages resulting from the loss of profits, loss of income, production or use, capital costs, inaction or delay costs, claims from the customers of the Client, costs of alternative energy, loss of anticipated savings, increase on the operating costs or any special damages, indirect or consequential or losses of any type.

The Seller, its agents, employees, subcontractors and suppliers shall not be liable for additional demands, especially those due to consequential damages. Likewise, it shall not be liable for any personal, material or monetary damage that the personnel of the Client or a third party might suffer due to material defects.

14. Applicable laws. Submission to Jurisdiction and Competent Authority

Any commercial transaction with the Client shall be governed by the Spanish Legislation, which will apply in all matters related to the interpretation, validity and implementation of these General Sales Conditions.

The parties expressly reject any other jurisdiction that might correspond to them and are subject to the jurisdiction of the Courts of Alcázar de San Juan, province of Ciudad Real, to resolve any dispute that may arise in the interpretation or compliance with these General Sales Conditions.
